

Clevedon School Vision and Purpose

Clevedon School is a progressive school, embracing evidence based ideology whilst retaining essential traditional values. It has a core purpose of delivering a holistic, inclusive education for all, where students secure ambitious and aspirational educational and career destinations.

Based on our guiding principle of “Be Kind – Be Brilliant” the school has developed a curriculum that is ambitious, develops character and reflects the community context of all our students. It is linked to an extensive range of co-curricular opportunities aimed at furthering enjoyment of school life and securing life long passions.

Through clear behaviour expectations, the school is focused on creating a safe and inclusive environment for learning, where students and Staff thrive in a community of respect, trust and aspiration.

We embrace our responsibility to create an environmentally sustainable institution where our combined efforts achieve remarkable things inside and outside the classroom, resulting in a higher level of progress, than similar students in other schools.

The school believes it should produce students who are literate in all facets of life, both as it is now and as it might be in the future; who are ready to contribute positively to local and wider society; who have a clear moral purpose and who exceed their perceived potential.

In summary, we develop kind and brilliant students with a common approach, shared by Governors, Staff and our families. It is known as the "Clevedon Way".
